Can you help me please, my tablet is in his country and I can't find in the country what's the firmware of this tablet and there's no site or something to download the file... And the firmware from mobile warehouse (instead of google play store) doesn't work... I tried some guys but nothing... Also I have a T-mobile Galaxy Tab 2 10.1 (GT-P5110). I'm from France, and my tablet is sold by a company called "myswiss". In their site, I can't find the firmware of my tablet but I can find that of GT-P5110. Can anyone help me please? I can't download the firmware from mobile warehouse (which doesn't work for me, I didn't succeed to update the firmware) and I can't find the firmware of my tablet (the GT-P5110) on Google. Did you try to install it via the software update menu on the device? You can also try searching here on XDA. Have you tried to update via the update tab on the main screen? I tried to download it from myswiss on the website and install it via the update tab on the main screen, but it seems that the tab doesn't work for my tablet. Do you have the last version of firmware of Samsung Galaxy Tab 2 10.1 GT-P5110? My tab is from mobile warehouse and it's the last one (I installed firmware version for gt-p5100 on tab) and it doesn't work on my tab. I installed the new firmware on my Galaxy Tab 2 10.1 (GT-P5110) in the update tab on the main screen, but the tab didn't update. Do you have the last version of 82157476af
